

ENVIRONMENTAL POLICY

East Coast Rock Works Group is committed to minimising our environmental impact while delivering exceptional civil construction and excavation services. Our Environmental Management System adheres to AS/NZS ISO 14001:2016 standards, guiding us to incorporate sustainable practices into every aspect of our operations. We aim to foster environmental stewardship through proactive measures and continuous improvement.

We commit to:

- **Implement sustainable practices** by integrating eco-friendly methods into our construction processes and project management.
- **Enhance energy efficiency** across our operations by adopting energy-saving technologies and practices.
- **Manage waste effectively** by reducing, reusing, and recycling materials, and ensuring proper disposal of waste products.
- **Prevent pollution** by controlling emissions and discharges, and minimising environmental impacts from our activities.
- **Adopt green procurement practices** by selecting suppliers and materials that support sustainability and reduce our environmental footprint.
- **Ensure compliance with relevant environmental legislation and regulations** to meet statutory requirements and demonstrate our commitment to environmental protection.

This policy will be communicated to all employees and stakeholders, ensuring it is accessible and understood. ECRW Group will regularly review and update this policy to reflect changes in environmental regulations, industry practices, and operational needs, striving for continuous improvement in environmental performance.
